all beef hot dog
- PEANUT BUTTER AND JELLY** 8
without the crust
- BAY BURGER** 8
hamburger or cheeseburger

GLUTEN-FREE BREAD AVAILABLE UPON REQUEST

ALL ABOUT THE FISH HAWK

Ospreys, also known as “Fish Hawk,” are birds of prey that eat fish.

They live near water:
Lakes, Rivers, Bays, Ponds.

Fish Hawks fly above the water looking for fish. When they spot one, they *dive down to catch it!*

They can dive 3 feet under the water surface, and can catch fish as large as themselves!

2 or 3 weeks after they first start to fly, *chicks will go hunting with their dad.*

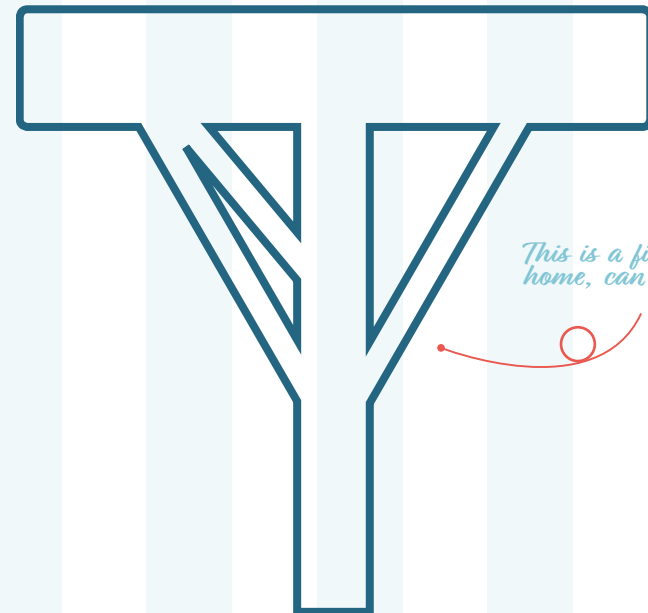

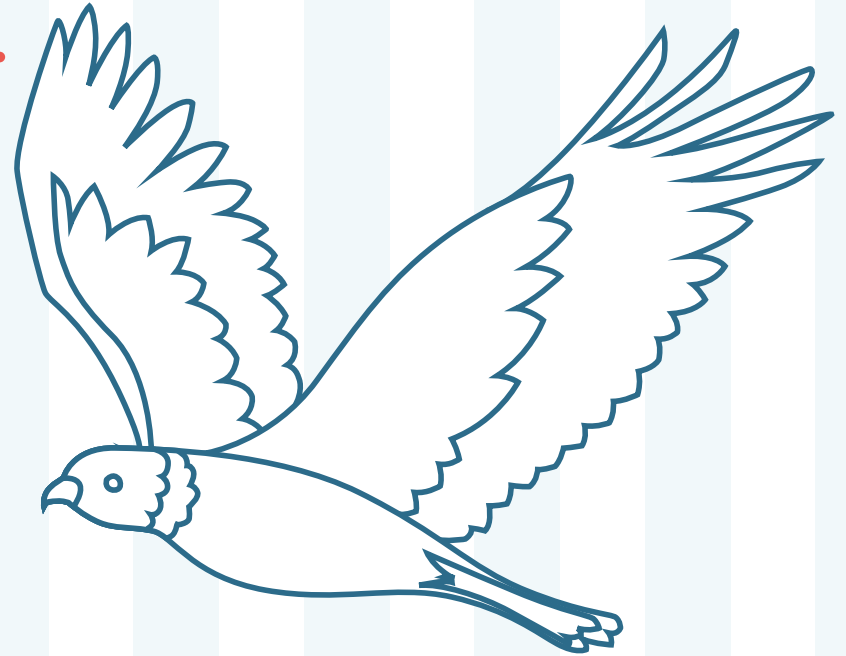

They have opposable talons — just like your thumbs! — to help them grip and carry fish away from the water.

Fish Hawks migrate *6,000 miles* from Canada to South America every year.

Fish Hawks build their nests atop docks, trees, and even telephone poles!

Fish Hawks add sticks to their nest every year. *Some nests are large enough for a human to sit in!*

What color is your fish hawk?

This is a fish hawk's home, can you color it in?
